

Drought-Tolerant, Low Maintenance Red Fescue

Celestial Strong Creeping Red Fescue represents an advanced generation of synthetic fine fescue cultivars that promise to expand greatly the usage of this species. At home in sun or partial shade, **Celestial** represents that best in low maintenance turfs for use in home lawns, parks, and golf courses.

Because of its fine leaf texture and darkest of green colors, it is highly recommended that **Celestial** be included in mixtures with Perennial Ryegrass and Kentucky bluegrass up to 40%.

Celestial Strong Creeping Red Fescue is a TWCA qualified turfgrass well suited for seed mixes intended for golf courses, as well as residential and park landscaping.

Celestial shows strong seedling vigor upon emergence and was rated at the top of its class in spring green-up, and spring & summer density. It has the best winter color and is resistant to many turf diseases such as leaf spot and red thread... all proven through NTEP trial results in which **Celestial** rated #1!

In environmentally sensitive areas or on golf course roughs for that “dunes” look, **Celestial** was the top rated fine fescue when rated under non-mowed conditions, making it do “double-duty” as an ornamental grass!

The qualification of **Celestial** by the Turfgrass Water Conservation Alliance (TWCA) represents a continuation of **TMI's** commitment through our AquaWise program to continue to offer improved seed performance for our distribution partners, as well as leading the industry in environmentally responsible solutions.

KEY BENEFITS:

- **Low Maintenance Requirements**
- **Low Input Requirements**
- **Drought-Tolerance**
- **Summer & Winter Color**

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
