

## You'll WIN with Jackpot

- ✓ Excellent seeding vigor
- ✓ Quick to germinate and establish
- ✓ Great spring green up
- ✓ Good against rust and powdery mildew

Don't gamble with a less rounded variety when you can win with Jackpot. Jackpot Kentucky bluegrass (*Poa pratensis*) competes with BMVG and Shamrock type varieties but it is newer and shows better turf qualities.

Jackpot is a cost saving variety with pleasing medium-fine leafed, medium-green variety and with excellent seedling vigor. Jackpot jumps off to a quicker start than many Kentucky bluegrasses with its faster germination and establishment.

Jackpot also exhibits excellent wear ability under traffic stress.

Jackpot has great spring green up, high spring and fall performance and great cold tolerance.

Jackpot shows good tolerance against rust and powdery mildew. It performs on heavy soils with moderate fertility but does not like acidic soils.

Jackpot is a good fit to blend with some elite Jacklin 5-Steps Above varieties for sod and landscape. Ask your Jacklin representative how you can win using Jackpot in your blends and mixtures.
