

Supercharge your hay production with Octane, the high forage yielding leader that consistently produces more dry matter and milk per acre. Its stability and persistence deliver high performance year after year. Octane dense, dark green canopy and 60% multi-foliolate expression is a standout in any field.

Octane is selected for high forage dry matter yield, high forage milk per acre, high NDF and disease resistance.

Explosive Disease Resistance & Winterhardiness.

Scoring a perfect 35/35 on the Disease Ratings Index (DRI), Octane is highly resistant to all diseases including Aphanomyces Race 1 & 2. Octane is a fall dormancy class 3 (FD 3) tap root, with exceptional winterhardiness that is comparable to creeping root alfalfa.
