

SLINGSHOT ALFALFA

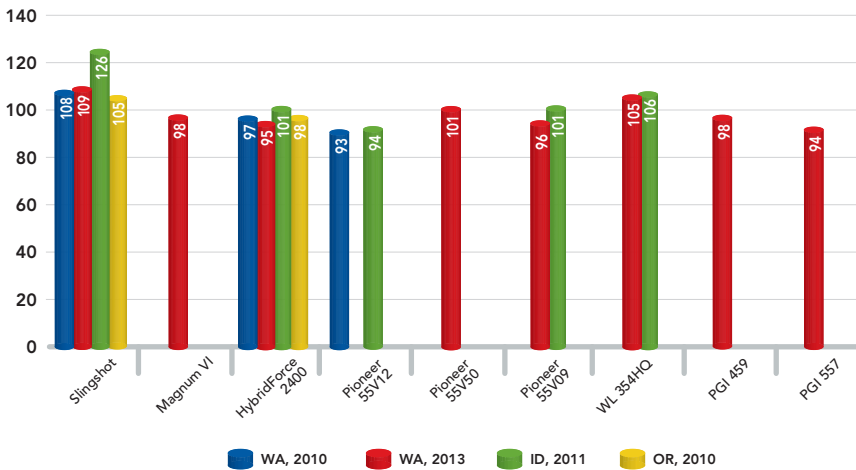

Propelling Higher Yield & Quality

Slingshot is a high yielding fall dormancy 5 alfalfa, bred for winterhardiness. It is well suited to an aggressive multi-cut system. Expressing a high degree of multifoliate leafiness contributes to its impressive quality. Complimented by a perfect 30/30 score on the Disease Resistant Index (DRI) helps propel hay, haylage, green chop and dehydrated product to the next level.

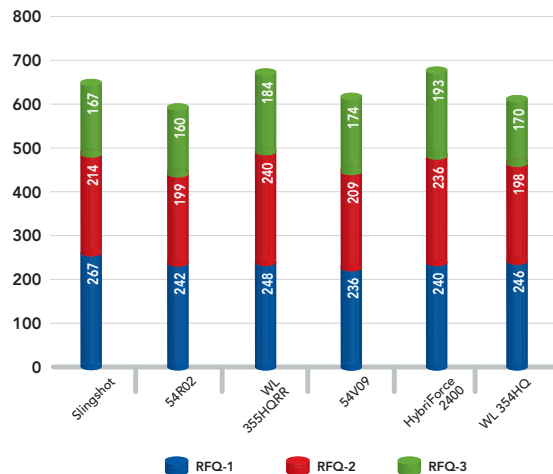

Slingshot is highly resistant to anthracnose, aphanomyces root rot (race 1), fusarium wilt, verticillium wilt, phytophthora root rot, pea aphid, spotted alfalfa aphid, northern root nematode and stem nematode. It is resistant to bacterial wilt.

Parental selections came from forage nurseries in Idaho, Washington and Wisconsin. Plants that demonstrated persistence, vigor and disease resistance were selected.

Yield Performance

Feed Quality

Features

- High Yield
- Winterhardiness
- Aggressive Regrowth
- Disease Resistance
- High Forage Quality
